Welcome to the 7th issue of INMOTION.

It is amazing how fast the year has gone by and we are already past the mid-year mark!

WCT Group had a busy and fruitful first half of the year. In construction, WCT was awarded the Gold Award by the KLCC Group of Companies and WCT Land, the property development arm of WCT launched the much anticipated 1Medini Garden Villas, Iskandar Malaysia to potential investors in Singapore.

In May, WCT enjoyed a double celebration when the Group's third retail project, gateway@klia2 finally opened its door to the public on 2 May 2014 and Paradigm Mall celebrated its second birthday on 23 May 2014.

Also, WCT successfully sealed its partnership with AirAsia BIG through the WCT-AirAsia BIG Joint Loyalty Programme. Learn more about the Joint Loyalty Programme in this issue.

In our special feature, we share WCT's world-class engineering capabilities through an interesting photo journal on some of the Group's on-going local and international projects. We also dedicate this issue to the colourful and festive Hari Raya celebrations with some interesting ideas on how you can brighten up your home to welcome your favourite guests.

We hope you will enjoy this issue. If you have any suggestions on what stories you would like to read, feel free to contact us at corporate.affairs@wct.my

We would like to wish all Muslim readers, Selamat Hari Raya Aidilfitri and Happy Merdeka and Malaysia Day to all Malaysians.

WE'D LOVE TO HEAR FROM YOU!

Sepang International Circuit, Malaysia

Yas Marina Yacht Club, Abu Dhabi, UAE

WCT Group is no stranger to the engineering and construction industry and with an excellent track record of three excellent decades in the industry.

To date, WCT has worked on a wide-range of local and international projects that has cut across a broad spectrum of the industries, including civil works, construction of expressways and highways, F1 racing circuits, airports, dams and water supply schemes, buildings and interior fit-out works.

The following photo journal on some of the Group's on-going projects, both locally and abroad, illustrates WCT's world-class engineering capabilities.

Government Ministry Complex, Qatar

WCT has a strong portfolio in constructing numerous government buildings in Putrajaya, the Federal Government Administrative Centre of Malaysia, such as the Ministry of Trade and Consumer Affairs (Lot 2G3) and the Ministry of Information Communication and Culture (Lot 4G9), among others.

In 2010, WCT took its expertise to the next level when the Government of the State of Qatar awarded WCT with a contract to construct, complete and maintain a Government Ministry Complex in Qatar. The complex is constructed with high quality finishing and meets international quality assurance and quality control standards.

The team have made good progress at the project site to date. The structural works have been substantially completed at the Main Building and Public Wing Building, while final works are being carried out for the Multi Storey Car Park building.

Main Building: External stone cladding installation works, architectural and interior design works and mechanical, electrical and plumbing (MEP) works are in-progress.

Public Wing Building: External architectural finishes and internal architectural works including marble, tiling and ceiling works are in-progress.

Multi Storey Car Park Building Night View: The team is finalising the approvals for the external façade lighting.

Ministry of International Trade and Industry, Kuala Lumpur

In early 2012, WCT secured a RM300 million contract to design and build the headquarters of the Ministry of International Trade and Industry (MITI) on Jalan Khidmat Usaha, Kuala Lumpur.

This project consists of a 31-storey office tower, a two-storey carpark and a three-storey podium. The building is designed to comply with the Green Buildings Index (GBI) Gold Rating and is subjected to the QCLASSIC Quality Assessment System for building construction works.

As at end of May 2014, the superstructure works is 71% completed and the architectural, mechanical & electrical works and façade works are well on track. The construction is expected to complete by 1Q 2015.

PLUS Fourth Lane Widening Works Between Nilai and Seremban Expressway

Since the early years, WCT has specialised in earthworks and its core business, engineering and infrastructural works remains at the forefront of the Group's business.

WCT's latest project, the RM391 million Fourth Lane Widening Project between Nilai (KM 280.4) and Seremban (KM 258.5) involves the widening of the existing dual 3-lane expressway to a dual 4-lane expressway for the South and North bound traffic.

As at early May 2014, the team have started the pavement works for the New Emergency Lane and New Slow Lane for the South Bound traffic. The targeted completion date for the South and North bound traffic between Nilai and Seremban is January 2015.

Soil nailing works and guniting (spraying of dry concrete mixture) works are being carried out to improve and stabilise the slopes

Laying of CBM 4 layer for pavement at the New Slow Lane

Moving forward, WCT will continue to strengthen its existing construction market presence in Malaysia and the Gulf States by leveraging on the Group's 33 years of Engineering & Construction track record in iconic projects.

Radiant Orchid Hari Raya Celebrations
